

Setting Up Group Policies

Step 1: Install the Group Policy Management Tools:

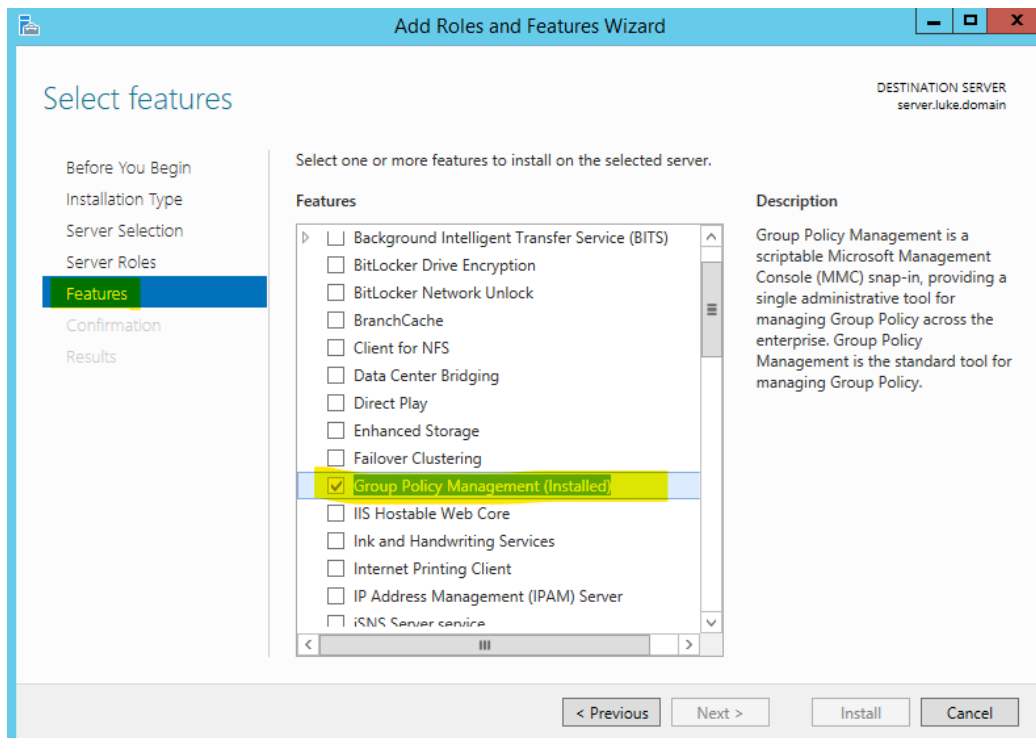

Step 2: On your Windows Server, open Server Manager.

Step 3: Go to Manage > Add Roles and Features.

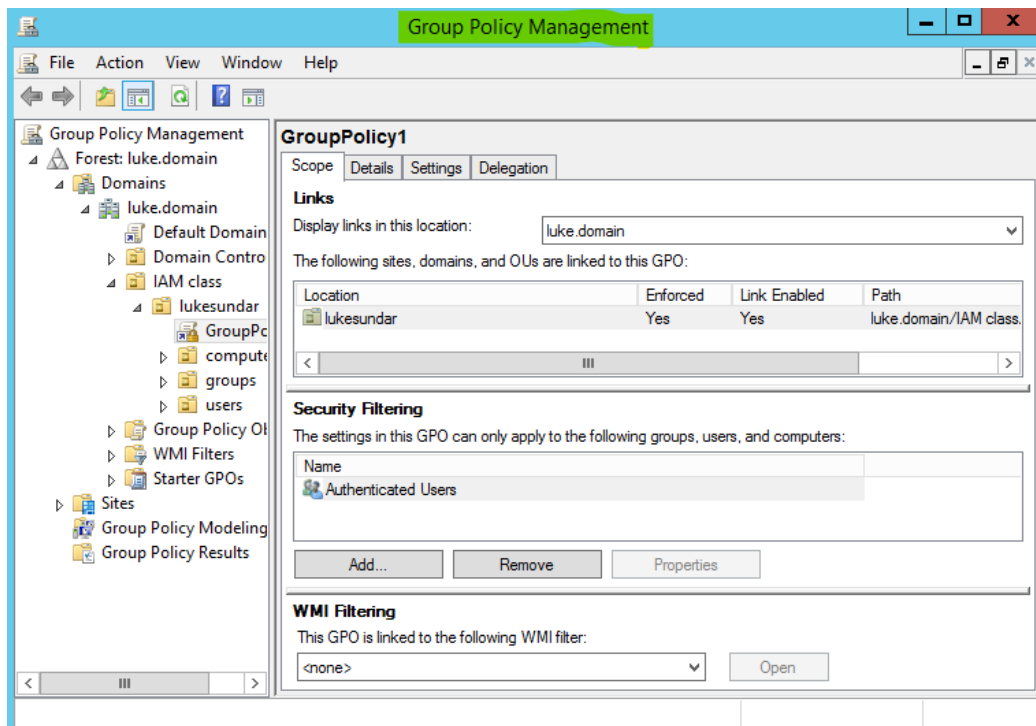

Step 4: Proceed to the Features section and install Group Policy Management.

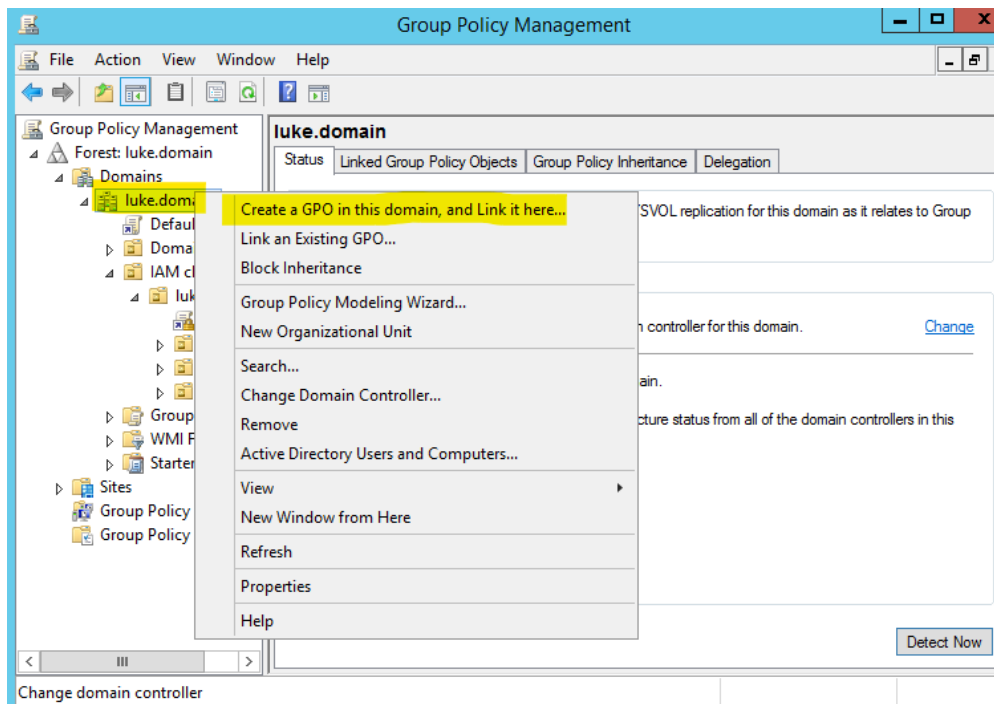

Create and Link a GPO:

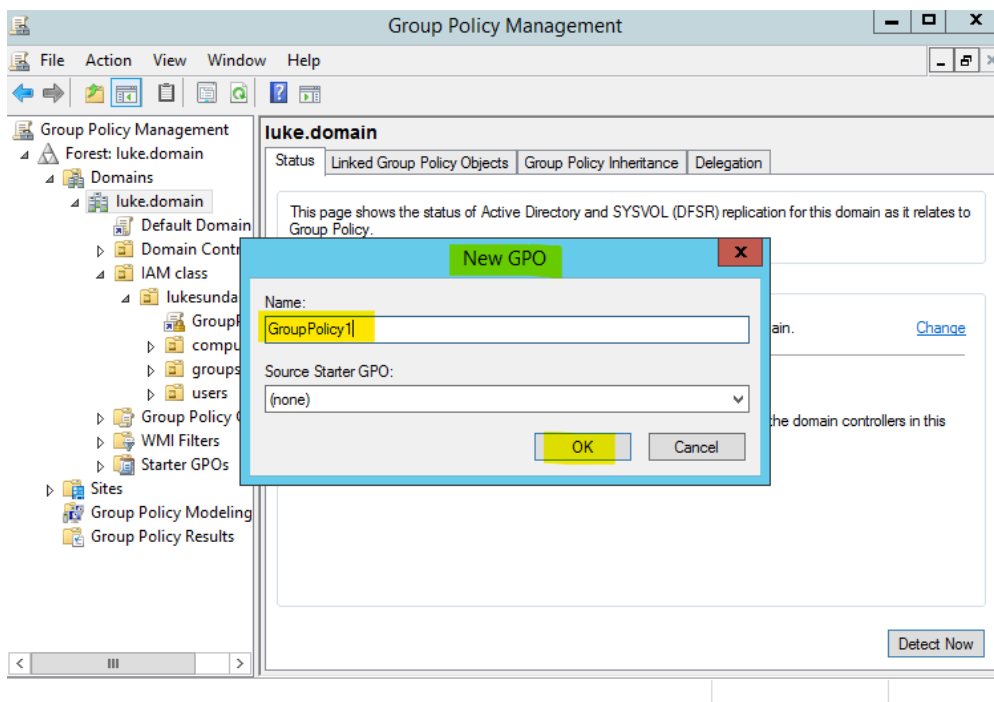

Step 1: Open Group Policy Management from the Start Menu.

Step 2: Right-click your domain or an organizational unit (OU) and select Create a GPO in this domain, and Link it here.

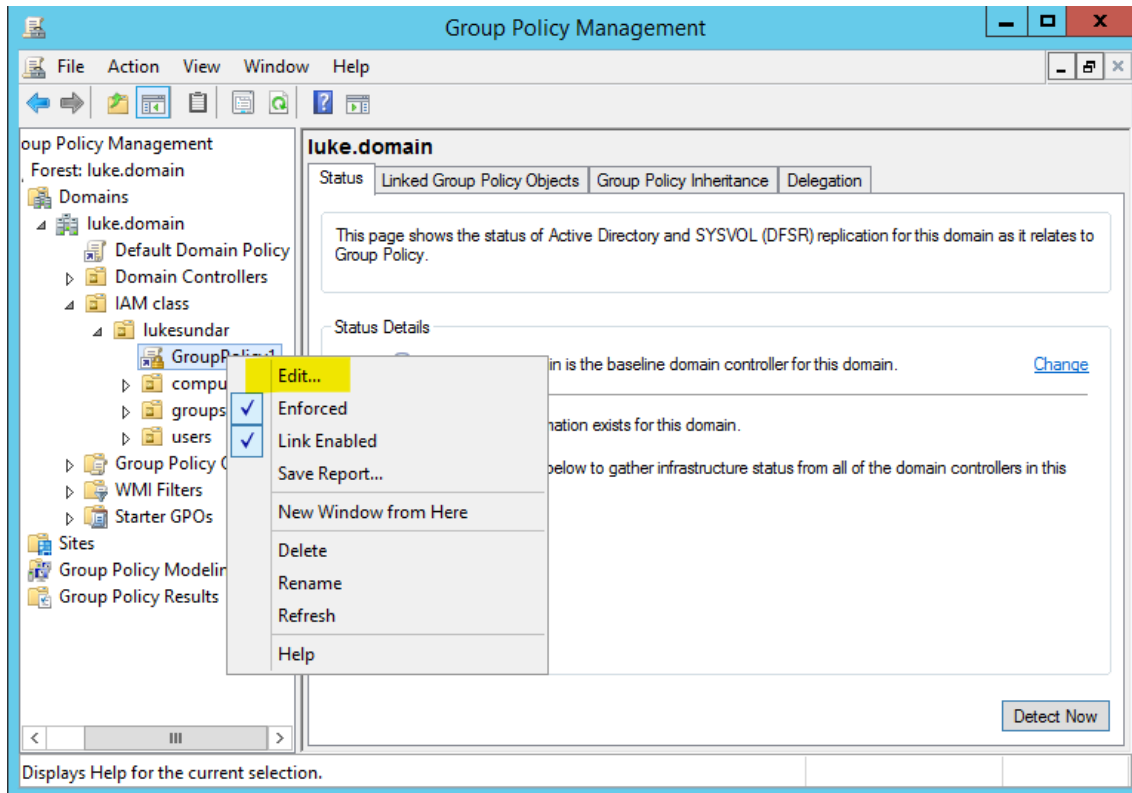

Step 3: Name the GPO (e.g., Map Network Drive Policy).

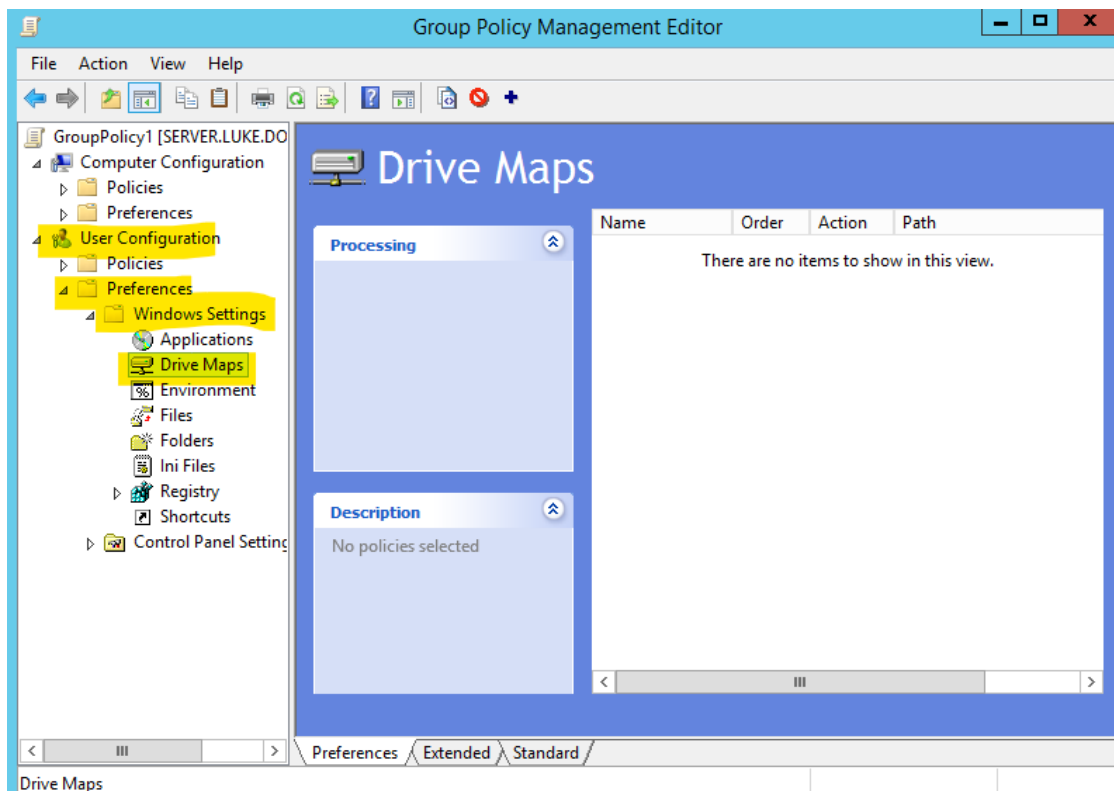

Edit the GPO to Map Network Drive:

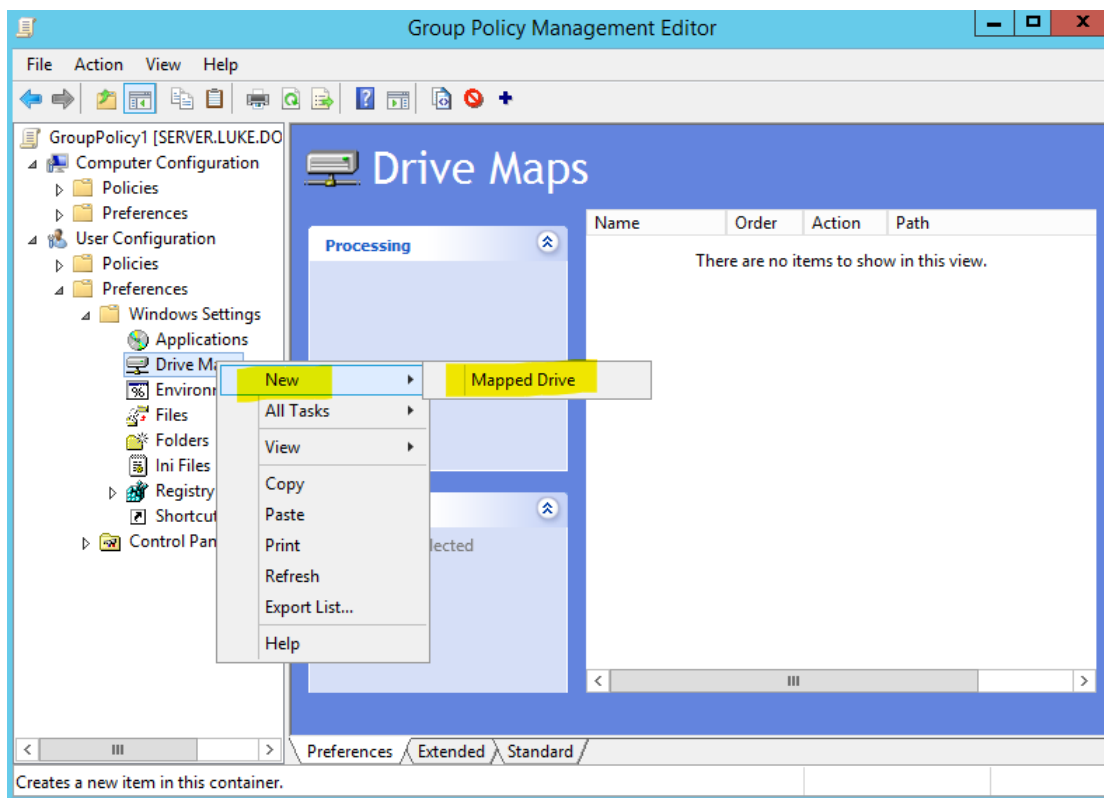

Step 1: Right-click the new GPO and select Edit.

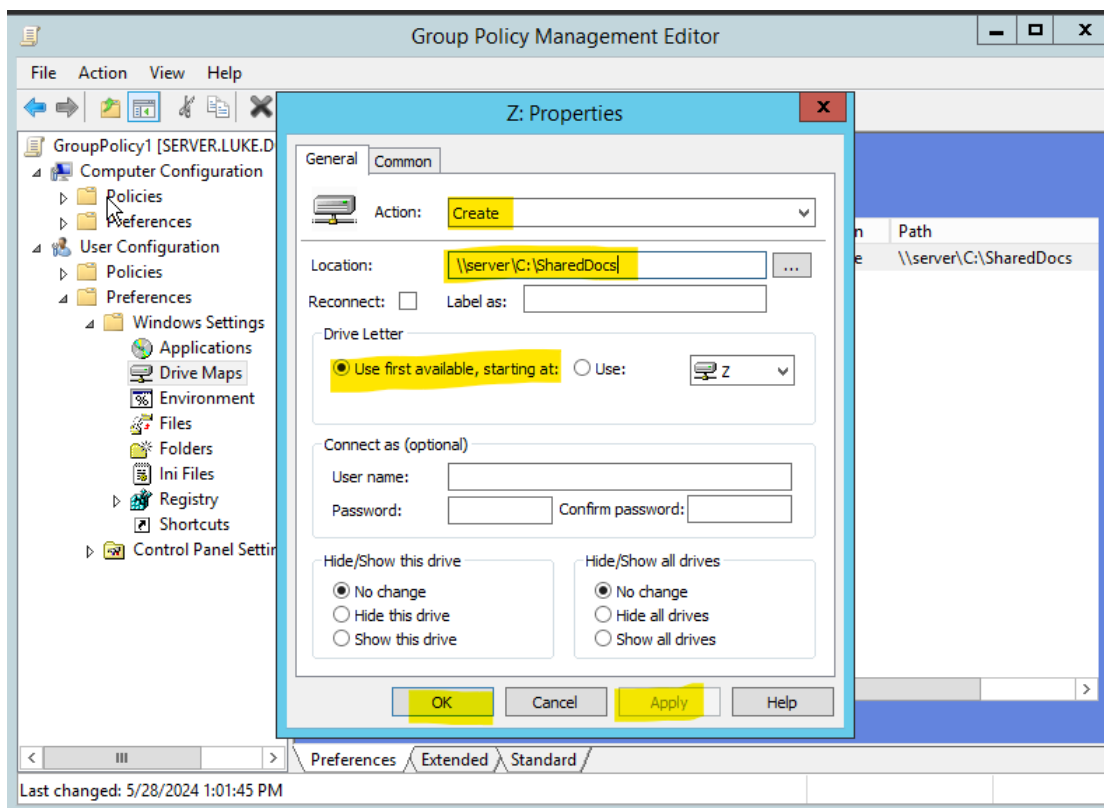

Step 2: Navigate to User Configuration > Preferences > Windows Settings > Drive Maps.

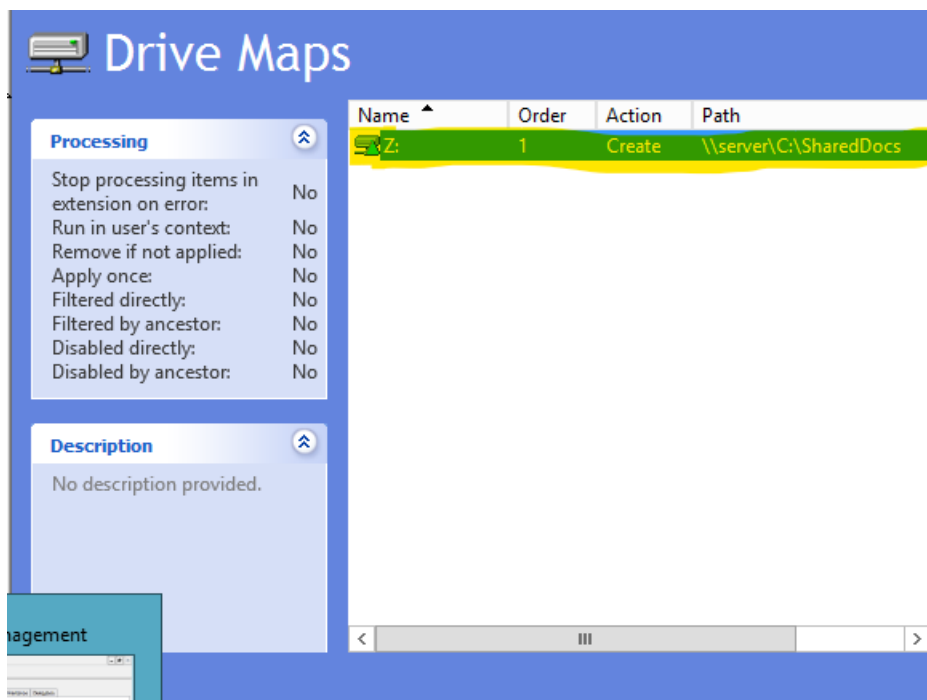

Step 3: Right-click Drive Maps, select New > Mapped Drive.

Step 4: Set the action to Create, specify the location (\\ServerName\SharedDocs), and choose the drive letter.

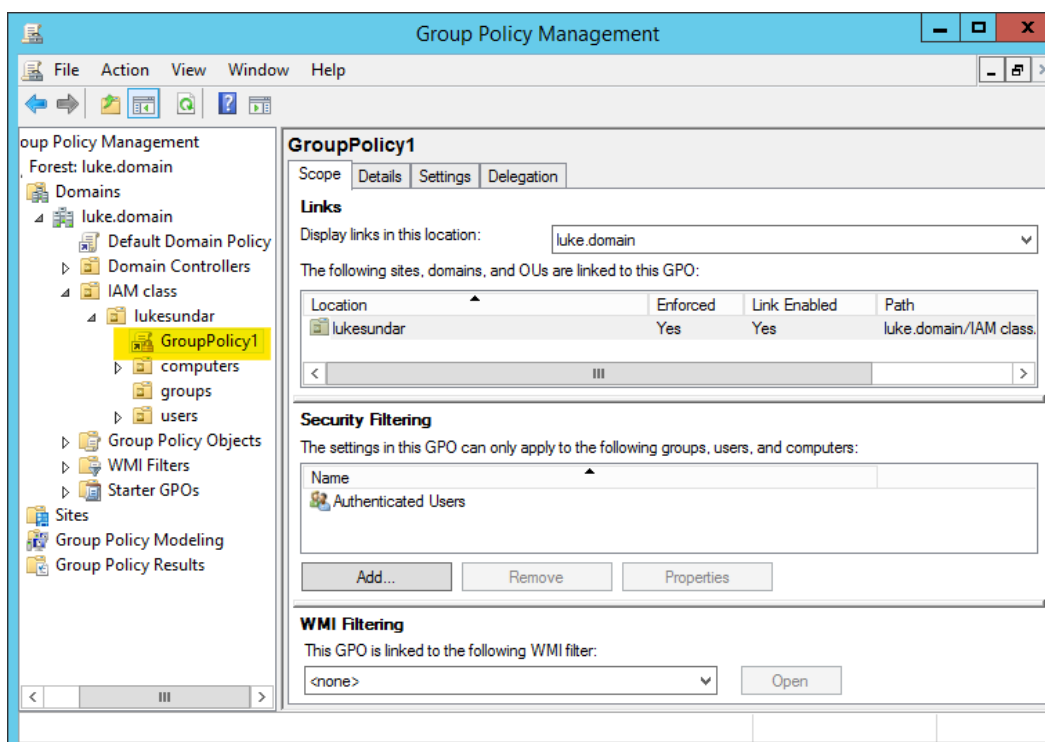

Step 5: Configure other settings as needed, then click OK.

Apply and Test the GPO:

Step 1: Ensure the GPO is linked to the correct OU.

Step 2: Force a Group Policy update on the client machine by running gpupdate /force in Command Prompt.
